

Executive Management Reporting & Board Support

A portfolio sample demonstrating executive reporting, board meeting support, action tracking, and project-control presentation capability.

Professional Reporting Positioning

Built around executive office coordination, board support, PMO-style project administration and management reporting.

BOARD SUPPORT

CORE POSITIONING

Capability	Evidence in Work	Portfolio Proof
Executive office support with cross-functional follow-up	Action tracking, meeting notes, MOMs and closure visibility	Board support — MOMs, DocuSign, agendas
Management-level KPI reports, dashboards and presentations	Document control	This deck + action logs
Document workflows: Aconex, DocuSign, SharePoint / Drive	Letters, transmittals, drawings	Command Center workbook
Operations coordination across logistics, facilities, transport and procurement	KPI reporting — Excel, Power BI, SQL reporting	Power BI + Excel repos
Leadership follow-up on open actions and deadlines	Operations control — fleet, facilities, procurement	Control Center workbook

The portfolio is structured to prove practical administration and reporting capability — not only tools, but management follow-up, controls and decision-ready visibility.

Executive Reporting Operating Model

A repeatable reporting flow from raw inputs to management decisions and closed actions.

Designed result: leadership does not chase status manually — they see open items, risk, ownership and overdue exposure in one structured reporting cycle.

Sample Executive KPI Pack

A board / management review slide combining status, risk and action closure visibility.

ACTION EXPOSURE BY FUNCTION

ACTION STATUS MIX

RISK REGISTER

Risk	Cnt	Pri.
Overdue >14d	10	High
Unassigned	4	High
Pending sign-off	8	Med
Late submission	5	Med
Closed this wk	12	Pos.

Message to management: focus first on overdue items, missing owners and pending sign-offs; everything else remains visible through the routine dashboard cycle.

Board & Management Meeting Cycle

A clean board secretariat workflow: agenda, minutes, approvals and action closure.

BOARD SECRETARIAT FLOW

Agenda
Planning

Meeting
Notes

MOM
Drafting

DocuSign
Sign-off

Action
Closure

Output	Purpose
Agenda	Meeting scope & owner inputs
MOM	Decisions and action owners
Action Log	Closure status and aging
Sign-off Pack	Controlled approval trail
Summary Note	Fast leadership review

Confidentiality

Controlled approval trail via sign-off pack

Clear Ownership

Every decision mapped to a named owner

Closure Focus

Approval trail carried through to action closure

Strong board support is not only writing minutes — it is preserving decisions, owners, deadlines and follow-up discipline.

Document Control & Correspondence Reporting

Portfolio design for correspondence registers, transmittals, revision tracking and response aging.

CORRESPONDENCE STATUS

ACTIVE EXPOSURE BY DEPARTMENT

CORRESPONDENCE REGISTER (SAMPLE)

Ref	Type	Status	Aging	Owner
COR-001	Letter	Action Req.	18d	Contractors
COR-002	Transmittal	Under Review	7d	Engineering
COR-003	RFI	Open	12d	Construction
COR-004	Submittal	Closed	0d	Doc Control
COR-005	Memo	Open	21d	Management

Why this matters

- Every incoming letter, transmittal or RFI is registered with a reference number, an owner and a due date — so response aging is visible before it becomes a delay.
- Closed items retain a link back to the original document, keeping the register audit-ready at any point in the project.

DOCUMENT WORKFLOW

- **Receive**
Letter / drawing
- **Register**
Ref no. & metadata
- **Assign**
Owner + due date
- **Track**
Aging + response
- **Archive**
Link + closure

9 DAYS

Average correspondence response time across all departments

Procurement, Payment & Operations Control

Executive presentation view connecting PR/PO workflows, invoices, payments and operational support.

CLOSE RATE

PAYMENT CONTROL TREND (M SAR)

CONTROL AREAS

Control Area	Metric	Status
PR/PO Aging	14 open > 10d	Watch
Delivery Records	92% received	On Track
Invoice Follow-up	8 pending	Action
DocuSign Sign-off	5 waiting	Action
Monthly Close	Ready for review	On Track

The value of executive reporting is the connection between workflow status, financial exposure and responsible follow-up.

Portfolio Roadmap & Recruiter View

A clean story for recruiters: practical reporting outputs mapped to real administrative roles.

1

Executive Assistant / Secretary

Board cycle, MOM, action log, presentation deck

Executive Reporting Deck — Board / management reporting presentation sample

2

Project Administrator / PMO Support

Project control center + KPI dashboards

Power BI Workforce KPI Dashboard — Workforce, attendance and overtime analytics

3

Document Controller

Correspondence command center + hyperlink registers

Document Control Command Center — Correspondence, document register and hyperlinks

4

Operations / Facilities Coordinator

Workforce, fleet, procurement and action controls

Executive Project Operations Control Center — Actions, procurement, workforce, KPI scorecard

RECOMMENDED GITHUB STRATEGY

Keep fewer repositories, but make each one polished, role-relevant, and easy for recruiters to understand in 30 seconds.
